

Vision

"Become a national market leader and prepare to enter regional market as well as enhance performance to compete and lead in free trade era."

Mission

- Create a synergy with our customers to provide more than mere customer satisfaction, and keep customer's loyalty.
- Encourage innovation and project development to maintain a leading edge and keep our project's competitiveness one step ahead from the competition, that means bringing our customers to the future with an early advantage.
- Maintain the high standards of our human capital resources that would provide us with managers of the future who are always proactively adaptive towards any changes in the industry.
- Enhance efficiency in all departments and increase in productivity and quality, hence supporting our main goal to compete and win the major share of the market.

MURINDA

...a long tradition of innovative construction...

The hopes of thousands of people lives within each company. As one of the Indonesia's largest general contractors and steel structure, Murinda has been involved in numerous projects, such as hotel, apartment, office building, hospital and health center, shopping mall and trade center, residential, factory, educational facilities, chemical plant, airport building, terminal and hangar, power plant, industrial plant, bridge, and other commercial building. We share innovative technologies, provide job opportunities, and maintain some of the highest industry standards on earth.

PT Murinda Iron Steel is a leader in construction. Its operations in general contractor and steel structure are designed to meet customers' needs. In order to deliver quality and value to customers, it is Murinda tradition to be responsible to approach the business partner. We focus on efficient operations and innovations, as well as skill to sustain competitive advantages through business cycles.

Since its establishment on June 28, 1974, the company has successfully increased its performance. From housing project to high rise building and mall such as WTC Mangga Dua Trade Centre with 235,000 sqm, huge projects like "Office, Plant, Warehouse and External Works" of Jakarta Greenfield for PT HM Sampoerna Tbk with 570,000 sqm total area, and 52 stories BCA Office Tower of PT Grand Indonesia in Jakarta; as well as a factory project as small as 40 tons of steel to the huge industrial plant project as huge as 10,000 tons or more.

In 1997, despite the prolonged monetary crisis, Murinda increased its production capacity to 20,000 tons and earned a revenue of 900 billion Rupiahs per year. Not only does our success as a contractor depends on our skill and the delivering of quality, but also on our shared commitment to our business partner.

Our strategy is focusing on delivery value with competitive cost operation in order to maintain our positions in quality of projects and long term economic value. We also seek efficiency improvements. For over 37 years in construction service area in Indonesia, Murinda has worked with many foreign contractors, and has received a lot of transfer management.

As the motto " ... a long tradition of innovative construction" Murinda always motivates the employees to be innovative and to continuously provide customers with the same outstanding service.

Construction Superiority in Global Competition

Surya Sentosa, Budiono Santoso, Edi Noto Widjaja

It is my pleasure to introduce you to the three main traits, creativeness, integrity and quality, that would lead us as we advance in the new global challenge. This is what we promise our customers in every project we work on.

At Murinda we take pride in our superiority in construction, which is delivered with high standard production and services that provides the desired results as planned, with the leading quality that maintains those results long after project completion.

This promise is built on over 37 years of construction experience with our continuing effort in developing and strengthening our resources to maintain a leading edge in the industry.

This leading edge is what we offer to our customers as we enter the ever-growing global competition - a plateau of ever changing challenges.

With over 700 projects of all sizes behind us, each built with pride and enthusiasm, we aim to take our winning formula, proved by our strong position in the industry and backed by a sound financial footing, to provide the best choice of services as your preferred partner in developing your edifice of pride.

Our final hope is that developers throughout Asia will share our pride in our achievements as we embark on a journey of new global partnerships. Solid partnerships that will stand the test of space and time, and lift us to the pinnacle of construction superiority.

Budiono Santoso
President Director

The multi-faceted services of Murinda

Partnership and Teamwork

We regard our customers as our partners in success. Such a sense of deep value in our partnership allows us to work together in providing the best services for you. Teamwork creates a pleasurable, personal way of working together toward the common goal of a successful project. We strive to develop long-term, sustainable relationships through innovation and teamwork.

Experience and Innovation

With extensive experience in a wide variety of projects, we thrive on challenges that call for innovative solutions. Experience provides us with a unique hands-on insight on the latest construction projects and the lessons learnt along the way.

Our 33 years of experience does not stop there. As a recognized expert in providing cutting edge technology in the industry, we strive to provide the most benefits of the latest technology and techniques in the industry by keeping an active role in technology developments and taking those findings into practice. We believe the key to our success lies in the extra measure of creativity we bring into the art of building.

Quality Service

Our products and services meet the needs and expectations of our customers consistent with quality, regulatory and professional standards. As a core value to us, quality is maintained in all aspects of the project as value is created in each step we take. To fulfill this commitment, we implement ISO 9001:2000 quality management system to increase company's efficiency and effectivity.

On Time, On Budget

At Murinda, we continually apply our combined expertise in design and construction to get projects delivered on time and on budget. This is part of our full commitment to our partnership in reaching our goals.

With our full commitment in knowledge partnership the benefits of our findings will be a competitive advantage to your project.

People Development, Safety and Ethics

At Murinda, we are well aware of our responsibilities and duties to our environment. Creating employment and developing our people are the main strengths that have taken this establishment to its current position. In doing so we also demonstrate a high level of honesty, integrity, fairness, and personal accountability in all we do to maintain a safe physical working environment and an even safer business environment.
