

MURINDA at a Glance

We are MURINDA, one of Indonesia's leading general contractors and steel structure fabricators, with over 50 years of experience and more than 2,500 completed projects nationwide.

Established on 28 June 1974, we are recognized for our excellence, reliability, and a long tradition of innovative construction. Over the years, we have had the privilege of partnering with international clients, including notable collaborations with Japanese companies, which have enhanced our technical expertise and strengthened our global perspective.

Although our name stands for MURINDA IRON STEEL, our expertise extends far beyond being a steel structure fabricator. We are a trusted, full-service general contractor with proven capabilities across a wide spectrum of construction projects, from factories, warehouses, offices, hotels, apartments, shopping malls, educational facilities, hospitals, airports, hangars, and other facilities. This dual capability—as both a general contractor and a steel structure fabricator—has positioned us as a versatile and reliable partner for sophisticated and large-scale developments.

As a steel structure fabricator, we also have extensive expertise in

high-rise buildings, bridges, steel conveyor supports, industrial plants, power plants, chemical plants, plate works, and other facilities. Our dedication to innovative technology, precision, and on-time delivery has earned us a reputation for maintaining some of the highest quality standards in the industry.

To further support our operations, we have continuously expanded and relocated our steel structure fabrication facilities in alignment with Indonesia's industrial development. Beginning in 1976 in Rawa Pasung area—West Bekasi, we moved to a larger site in Pasirgombong area—North Cikarang in 1996, before establishing our current workshop in Kalijati—Subang in 2021. This facility spans 13.5 hectares, is equipped with the latest technology, and has a production capacity of 2,000–2,500 tons per month, enabling us to deliver projects with greater efficiency, precision, and scale.

Over the decades, we have proudly contributed to prestigious national developments, including Tanjung Jati B Unit 5 & 6 Coal

Fired Steam Power Plant (2 x 1,000 MW), Central Java IPP Coal Fired Steam Power Plant (2 x 1,000 MW), as well as landmark projects from our steel structure fabrication line such as Mori Tower Office Building, SCBD Lot 10 Grade A Office Building, and BCA Office Tower of Grand Indonesia. We also take pride in having the opportunity to build iconic structures, including roof structural steel of Santo Kristoforus Church, Santo Andreas Kim Taegon Church, and conical roof of Margo City Mall, which reflect our capability in delivering technically demanding and architecturally significant works.

Our resilience was proven during several years of crisis, when we continued to adapt and innovate despite economic challenges. Guided by our motto, "A Long Tradition of Innovative Construction", we are committed to quality, efficiency, and sustainable value—turning the visions of our clients into reality, beyond expectations.

Vision, Mission, Policies, and Corporate Values

Our Vision

Become a national market leader and prepare to enter regional market as well as enhance performance to compete and lead in free trade era.

Our Policies

At MURINDA, we prioritize high quality and on-time delivery in every project, supported by rigorous HSE (Health, Safety, and Environment) standards across both our project sites and steel structure fabrication workshop. We are committed to safeguarding employees, clients, and stakeholders while promoting environmental responsibility. As a trusted general contractor and steel structure fabricator, MURINDA upholds strong business integrity by implementing anti-bribery and ethical practices involving all leaders, staff, providers, and partners, reflecting our dedication to responsibility, trust, and excellence.

Our Mission

- Create a synergy with our customers to exceed customer satisfaction, and keep customer loyalty.
- Encourage innovation and project development to maintain a leading edge and keep our project competitiveness one step ahead from the competition, that means bringing our customers to sustain their competitive advantage.
- Maintain the high standards of our human capital resources that would provide us with managers of the future who are always proactively adaptive towards any changes in the industry.
- Enhance efficiency in all departments and increase in productivity and quality, hence supporting our main goal to compete and win the major share of the market.

Our Corporate Values

A Long Tradition of Innovative Construction

Decades of experience meet cutting-edge innovation. We thrive on sophisticated challenges, combining time-tested expertise with the latest construction practices to deliver breakthrough solutions that push industry boundaries.

Excellence & Reliability

We regard our customers as partners in our success. Excellence and reliability guide every project we deliver, creating exceptional value at every step. Our commitment ensures consistent, dependable service that builds lasting trust.

Quality Service

Excellence isn't optional—it's our standard. We deliver quality that exceeds expectations while meeting all regulatory requirements.

On Time, On Budget

Promises made, promises kept. We deliver every project on time and on budget, proving our commitment to true partnership and shared success with every client.
